

RESPOND AND RECORD AS ONE

INTEGRATED BODY-WORN CAMERAS AND IN-CAR VIDEO SYSTEMS

When officers are out in the field, anything can happen in the blink of an eye. As an event unfolds, having a limited view of an incident can slow down both critical incident response and evidence collection processes. In the moments that matter, it is essential that all relevant parties have full visibility.

HOW IT WORKS

With products that are able to collaborate, the strength of your safety and security can multiply. The in-car video system works with body-worn cameras to capture every angle of critical incidents, so that you can respond quickly and efficiently, hands-free. When associated as a "group" with up to 8 body-worn cameras, recording will automatically be initiated the second another device is activated. Equipped with a HiFi Mic, 4K sensors and synchronized video playback, this integration provides clear audio and video evidence – so incidents are handled with ease, start to finish.

KEY BENEFITS

EFFORTLESS RECORDING

Ensure the capture of critical incidents with automatic recording triggers between in-car video systems and body-worn cameras.

LIVESTREAM AND LOCATION

Enhance officer safety with real-time video and location tracking to create real-time awareness during an incident.

COMPLETE CONTROL

Keep the chain of custody intact by managing video evidence, viewing synchronized playback and securely sharing footage as one folder with prosecutors and other agencies.

KEY PRODUCTS AND FEATURES

BODY-WORN CAMERAS

Safeguard your reputation and maintain the trust of your community by capturing secure, unbiased video evidence of every citizen interaction. Our state-of-the-art V700 body-worn cameras are designed specifically for law enforcement. With LTE capabilities, rugged exterior and long battery life (beyond just a 12-hour shift), the V700 can capture evidence-quality security with minimal contact.

IN-CAR VIDEO SYSTEMS

Get the whole picture. Backseat Occupancy Detection automatically initiates recording if a person's eye is detected inside the passenger compartment, and the HiFi Mic allows for crisp audio to go along with high-resolution video evidence. With multiple camera options, highly secure storage and upload, and collaborative integration with body-worn cameras, law enforcement officers can trust the M500 to be an impartial witness.

RESPOND AND RECORD AS ONE WITH MOTOROLA SOLUTIONS

We're reimagining the world of policing. Our mission-critical ecosystem unifies video, software and communications on a single platform to amplify collaboration and connectivity between technology and teams. By seamlessly integrating in-car video systems and body-worn cameras, we're helping ensure officers can gather the evidence they need to close cases without worrying about whether they're recording. Because when everything and everyone works together, safety is unstoppable.
